Horses, for generations, have carried us upon their backs, taking us farther and carrying us faster than we could travel alone. Today, horses can guide us to find our way in life. They challenge us to move beyond our previous limitations and forward to be our best self. Horses have an amazing ability to understand our true emotions offer a unique perspective and reflect back to us what we most need to know.

Nature soothes the soul and is an abundant source of creative and healing energy. Within the sacred power of nature and the compassionate heart of the horse familiar patterns are often challenged and resources untapped become available. Nature expands our capacity for focus, intention, and integration to help ourselves and others embody the gifts of self empowerment, self healing, & self care.
